SAFETY DATA SHEET

Section 1: Identification of the substance/mixture and company/undertaking

1.1 Product identifier
ENEOS PREMIUM MOTOR OIL SUSTINA 0W50

1.2 Use
Gasoline engine oil.

1.3 Details of the supplier of the safety data sheet
JX Nippon Oil & Energy Europe Limited.
4th Floor, 4 Moorgate, London EC2R 6DA, U.K.

1.4 Telephone number
+44-20-7186-0400

1.5 FAX number
+44-20-7186-0419

Section 2: Hazards identification

2.1 Classification of the substance or mixture

Classification according to Regulation (EC) No. 1272/2008
Skin Sens 1, H317

Classification according to Directive 1999/45/EC
Xi, R43

2.2 Label elements

Signal word  Warning
Hazard statements  May cause an allergic skin reaction
Precautionary statements

prevention  Avoid breathing mist/vapours/spray
Wear protective gloves
response  If skin irritation or rash occurs: Get medical advice/attention
Wash contaminated clothing before reuse
storage  None
disposal  Dispose of contents/container to incineration or recycling in accordance with local/national regulation.

Supplemental information  None.

2.3 Other hazards
The hazards of some ingredients have not been well investigated, so handle and dispose of with caution.
Section 3: Composition/information on ingredients

3.2 Mixtures \(^{a,b}\)

Other ingredients

| Synthetic oil \(c\) | >70 | NA | NA |
| Additives             | <30 |

\(^a\) NA: not available.

\(^b\) See Section 16 ‘Other information’ for full text of the R- and H-phrases.

\(^c\) DMSO extract <3% by IP346, so classification as a carcinogen does not apply.

Section 4: First aid measures

4.1 Description of first aid measures

- **Inhalation**: If inhalation of the product is suspected, remove exposed person to fresh air, and give rest. Get medical attention if symptoms persist.

- **Skin**: Remove contaminated clothing and wash affected area thoroughly with soap and water. If irritation or rash occurs, or contamination is severe, get medical attention. Launder contaminated clothing before re-use.

- **Eye**: In case of contact with eyes, irrigate with water for 15 minutes, occasionally lifting eyelids. Remove any contact lenses if easy to do. Get prompt medical attention if irritation occurs.

- **Ingestion**: If swallowed, wash out mouth thoroughly and give water to drink. Get immediate medical attention. Do not induce vomiting, unless instructed by medical personnel.

4.2 Most important symptoms and effects, both acute and delayed

- May cause skin allergy (dermatitis).

4.3 Indication of any immediate medical attention and special treatment needed

- Treat symptoms as they occur.
Section 5: Firefighting measures

5.1 Extinguishing media

Suitable: Water spray, carbon dioxide, dry chemical, foam, and sand are compatible with the product.

Unsuitable: Product will float on water, and water jets may cause spattering and spread fire.

5.2 Special hazards arising from the substance or mixture

The product is not classified as flammable, but will burn if involved in a fire, producing smoke, and toxic fumes, gases and vapours.

5.3 Advice for firefighters

Remove containers from fire or cool them with water spray. Firefighters should wear an approved self-contained breathing apparatus and full protective clothing.

Section 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

For large-scale spills, ensure full personal protection is worn. Keep unauthorised personnel from the spillage area. Ventilate area. Product may produce a slip hazard. Follow prescribed procedures for responding to large spills and reporting to authorities.

6.2 Environmental precautions

Prevent leakage of product into water-courses or drainage system by bunding, or diking with absorbent material.

6.3 Methods and material for containment and cleaning up

Stop the source of leak or release. Small spills can be mopped up with dry cloth. Collect larger spill using techniques such as sorbent materials or pumping. Collect spill and place in suitable container for disposal. Wash contaminated surfaces with water and detergent, and collect washings for safe disposal.

6.4 Reference to other sections

For recommended personal protective equipment, see Section 8. For disposal considerations, see Section 13.

Section 7: Handling and storage

7.1 Precautions for safe handling

Avoid skin and eye contact with the product, and inhalation of vapours, using measures as described in Section 8. Use only in a well ventilated area. Wash hands after use.

7.2 Conditions for safe storage, including any incompatibilities

Avoid contamination of the product with water. Do not store for long periods at high temperature. Store in a cool, dry, well-ventilated place, away from direct sunlight. Keep container closed when not in use.

7.3 Specific end use(s)

Not available.

Section 8: Exposure controls/personal protection

8.1 Control parameters
8.2 Exposure controls

Engineering controls  No special ventilation is usually necessary. Good general ventilation is recommended. However, if operating conditions (eg heating, spraying, or use in confined space) create high airborne concentration, local exhaust ventilation may be needed.

Personal protective equipment  For professional use, the need for personal protective equipment should be based on a workplace risk assessment for the particular use. Avoid skin and eye contact by wearing chemical resistant gloves (eg nitrile or Viton) and safety goggles. For handling larger volumes, wear further protective clothing (eg overalls, apron, sleeves). Wear respiratory protective equipment if exposure to mists or vapours is likely, eg through spraying or heating. PPE should be to European (EN) standards. Consult manufacturers concerning breakthrough times.

Environmental exposure controls  Not available.

Section 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

Appearance  Brown liquid
Odour  Slight
Odour threshold  Not available
pH  Not available
Melting/freezing point  –47.5 °C (pour point)
Initial boiling point/range  Not available
Flash point  224 °C (Cleveland open cup)
Evaporation rate  Not available
Flammability (solid, gas)  Not applicable
Flamm. or expl. limits  Not available
Vapour pressure  Not available
Vapour density  Not available
Relative density  0.845
Solubilities  Insoluble in water
Partition coeff. (K_w)  Not available
Auto-ignition temp.  Not available
Decomposition temp.  Not available
Viscosity  Not available
Explosive properties  Not available
Oxidising properties  Not available

9.2 Other information  None

Section 10: Stability and reactivity

10.1 Reactivity  Not available.
10.2 Chemical stability  Stable under recommended storage and handling conditions.
10.3 Possibility of hazardous reactions  No hazardous polymerisation.
10.4 Conditions to avoid  Prolonged exposure to high temperature and contamination with water.
10.5 Incompatible materials  Acids, bases, and oxidizing agents.
10.6 Hazardous decomposition products  Not available.

Section 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity  The product is not expected to meet the criteria for classification by the oral, dermal or inhalation routes.
Skin corrosion/irritation  The product is not expected to meet the criteria for classification as a skin irritant.
Serious eye damage/irritation  The product is not expected to meet the criteria for classification as an eye irritant.
Respiratory or skin sensitisation  No information available on respiratory sensitisation. The product contains skin sensitising ingredients so that the product is expected to meet the criteria for classification.
Germ cell mutagenicity  Not classified due to lack of data.
Carcinogenicity  Not classified due to lack of data. The oil ingredients are not classified for carcinogenic effects, on the basis that the DMSO extract is <3%, so that the classification as carcinogen does not apply.
Reproductive toxicity  Not classified due to lack of data.
Section 12: Ecological information

12.1 Toxicity
The product is not expected to be harmful to aquatic organisms on the basis of available information on ingredients.

12.2 Persistence and degradability
Not expected to be readily biodegradable.

12.3 Bioaccumulative potential
Not available.

12.4 Mobility in soil
Not available.

12.5 Results of PBT and vPvB assessment
Not available.

12.6 Other adverse effects
The product is water-insoluble and oil-based, and may form a sheen on water.

Section 13: Disposal considerations

13.1 Waste treatment methods
Incineration or recycling are recommended for disposal of this product. This product is not suitable for landfill or disposal via the drains. Disposal must be in accordance with current national and local regulations. Chemical residues generally count as special waste. General EU requirements are given in Directive 2008/98/EC, including procedures for the disposal of waste oils.

Wastes of this product are covered in the European Waste Catalogue, suggested code 13 02 06, mineral-based, non-chlorinated engine, gear and lubricating oils.

The hazards of the waste may differ from that of the product, and it is the responsibility of the waste generator to identify hazards and dispose wastes in compliance with applicable regulations.

Containers of this material may be hazardous when emptied due to product residue. All hazard precautions given in this data sheet must be observed for empty containers.

Section 14: Transport information

14.1 UN Number
Not classified as dangerous goods according to UN criteria.

14.2 UN proper shipping name
Not applicable.

14.3 Transport hazard class(es)
Not applicable.
### Section 15: Regulatory information

**15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture**

*UK*: Control of Substances Hazardous to Health Regulations 2002 (COSHH).
Workplace Exposure Limits EH40/2005, with 2007 supplement, Health and Safety Executive.

**15.2 Chemical safety assessment**
Not available.
